

SIMA

Ceiling lamp intended for installation in the interior.

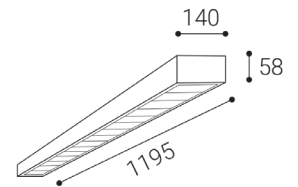

Light source - high performance LED. The lamp is made of metal with a white finish, the lampshade is made of aluminum and a PC diffuser with low glare - UGR<19. Available in 2 sizes.

Use - general lighting, thanks to low glare, suitable for all spaces where, according to the standard, a lamp with a UGR value <19 is required (schools, classrooms, workspaces with computers...) Also suitable as a replacement for older fluorescent lamps during renovations - administrative and commercial spaces .
